How to enable Macros in Excel

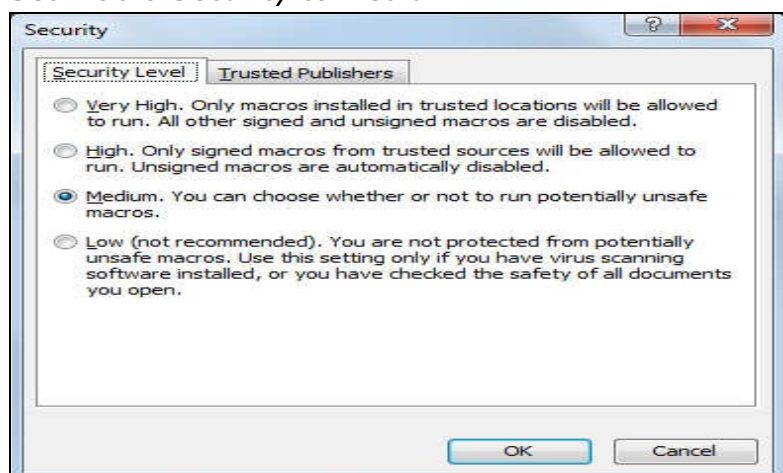

Macro must be enabled to use the functions of excel utilities available at **ABCAUS**.

In Excel 2003 or earlier versions

Go to Tools > Macro > Security

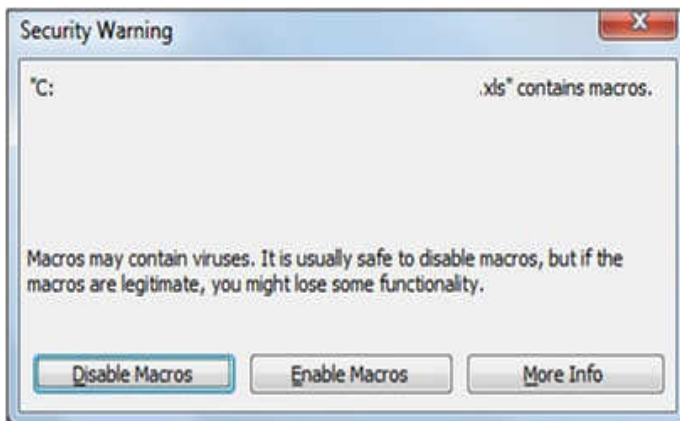

Set macro Security to Medium

Visit <http://abcaus.in> for more excel utilities

On File Opening you will be asked to enable macros, Choose Enable Macros

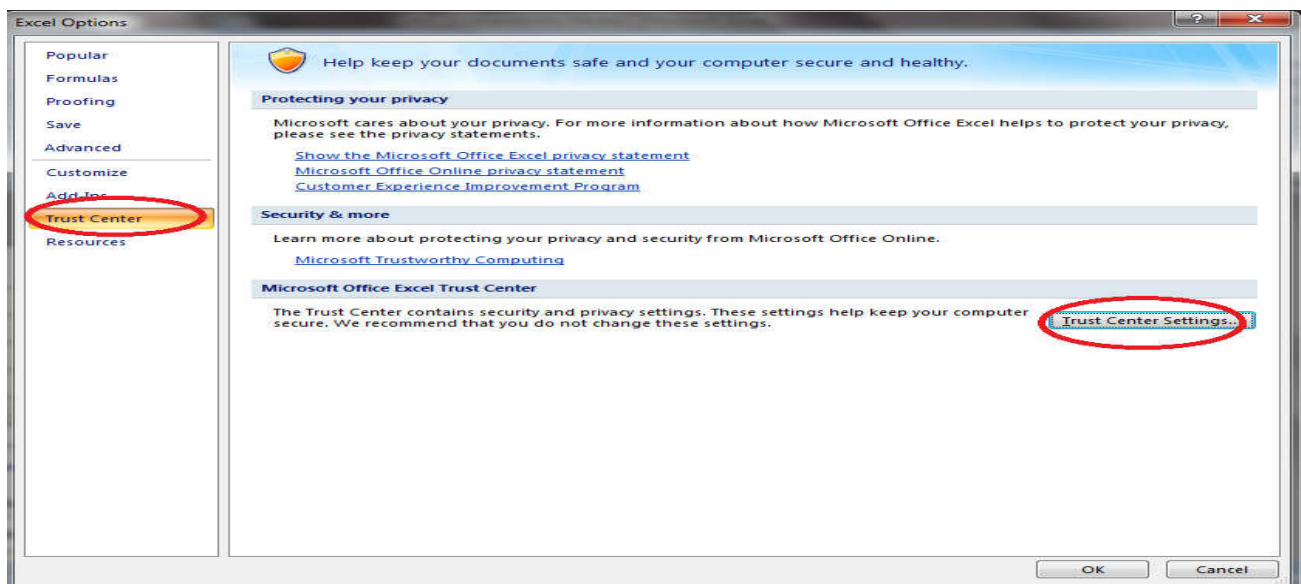

In Excel 2007 or later versions

Run Excel2007 then click Office Button at the topmost left

Go to **Excel Option>Trust Centre>Trust Centre Settings>**

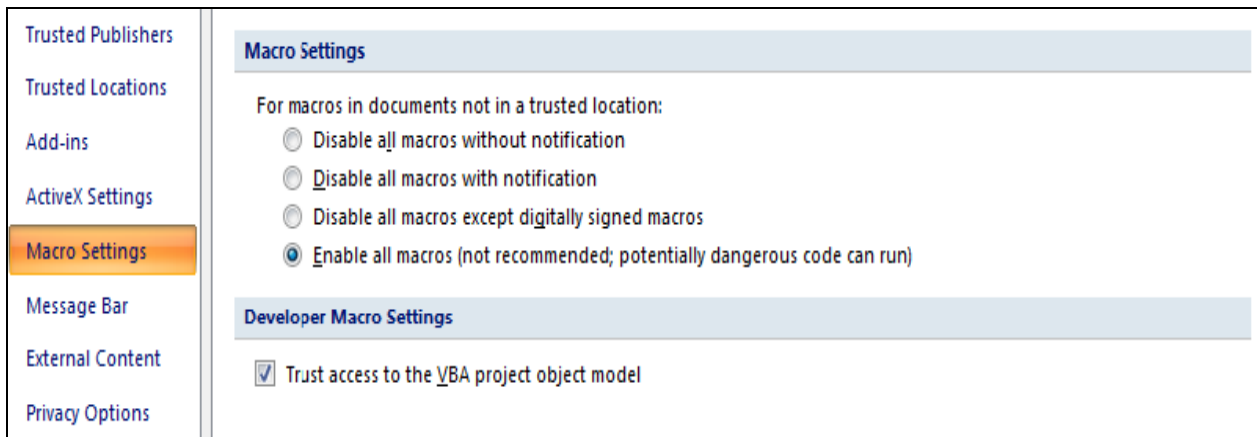

Visit <http://abcaus.in> for more excel utilities

Then Click on Macro Settings Left hand side tab

Then check the following two settings

Enable All Macros

Trust Access to the VBA Project Object Model

Click OK

Now you have enabled Macros.
