F.No. L-110110/26/2019-Trade (E-14194)
Government of India
Ministry of Fisheries, Animal Husbandry and Dairying
Department of Animal Husbandry and Dairying

Krishi Bhawan, New Delhi,
Dated the 15 July 2020

OFFICE MEMORANDUM

Subject: Regulation of import of live animals under the Livestock Importation Act, 1898 and amendments made from time to time - regarding.

This Department is regulating import of live animals under the Livestock Importation Act, 1898. The procedures for import of live animals into the country has been notified vide S.O. (1495), dated 10.06.2014 and as amended from time to time.

2. It has come to notice of this Department that a few pet owners are facing various difficulties on account of lack of requisite documents after importing pets into India for quarantine clearance. Therefore, henceforth, the final "No Objection Certificate" by the concerned Animal Quarantine and Certification Service (AQCS) shall be issued to imported pets (pet dogs and cats) at the port of entry itself. In case, any disease symptom(s) is/are found during physical examination at Port of Entry, the quarantine of imported pets shall be done at concerned AQCS. All such cases of quarantine of imported pets will be reported to DAHD with details and justifications. The information will be addressed to Secretary (AHD), AHC and JS(Trade).

3. For "**Ease of Understanding and Doing Business**" as well as streamlining the complete process of import of live animals into India by the importers, the Standard Operating Procedures (SOPs); Process for import; Application Form for obtaining advance No Objection Certificate from AQCS; Veterinary Health Certificate format to fulfil Indian requirements; format for advance No Objection Certificate; format for Physical Examination of Pet at port of arrival; format for Physical Examination of the pet/ animals during Quarantine period at AQCS; format for final No Objection Certificate, etc. have been standardized for import of live animals including pets into India and are **annexed** herewith. The details of post-import tests and name of laboratories where required tests will be done, has also been mentioned.

4. It is to clarify that the concerned AQCS will inspect only those documents which pertain to veterinary health requirements. The other documents/ licenses, which are required under various rules & regulations of other Departments including Customs, shall be inspected by the Customs authorities. The process as depicted in the annexure shall be implemented physically till the development of an on-line portal in this regard. Further, the communication with importers shall essentially be made through email in all cases to the extent feasible.

Contd.....

www.abcaus.in

5. The Standard Procedures and formats will come into force with immediate effect. However, the comments / suggestions on the SOPs are also invited from the stakeholders / importers for further improvisation, if any. The comments / suggestions (if any) may be sent to this Department within next 30 days of its display on website of DAHD and AQCS by email only at gagan.garg@nic.in.

6. This has the approval of the Hon'ble Minister for Fisheries, Animal Husbandry and Dairying.

15/7.2020

Encls: As above.

Standard Operating Procedure for Import of Pet Dog(s) in to India:

Pre Arrival Requirements:

1. Minimum 07 days before embarkation, the application form (Annexure 1.1) will be submitted through email / physically by the applicant.
2. After examining the uploaded forms, Advance No Objection Certificate (NOC-Annexure 1.2) will be issued by the concerned Animal Quarantine & Certification Station (AQCS) within 1 working day along with parameters to be examined on arrival (Annexure 1.3).

On Arrival at the Port of Entry

1. The AQCS's Officer will carry out physical examination of the dog(s) as per the prescribed format (Annexure 1.3) at the port of entry.
2. In case the dog(s) is/are found sound and healthy (as per the Annexure 1.3), final NOC (Annexure 1.5) will be issued at the port of entry itself.
3. In case the dog(s) fails to clear physical examination or exhibits clinical signs of diseases mentioned in format at annexure 1.3, it will be taken to the Quarantine Station and will remain under quarantine for 15 days.

During Quarantine Period at AQCS

1. Everyday examination record (Annexure 1.4) will be maintained and testing will be done as per annexure 1.3. If any signs/symptoms will be found, the same will be recorded or updated online. The applicant will bear the charges for testing.
2. Final NOC (Annexure 1.5) will be issued in case negative test reports are obtained for the dog(s) under quarantine.
3. In case of the positive testing reports or if the pet dies of disease, deportation/Post –Mortem and incineration will be done at the cost of owner.

***Complete process of clearance is depicted at annexure 1a, 1b and 1c.**

Note: If owner of pet(s) is unable to visit Animal Quarantine & Certification Services personally for the purpose of obtaining No Objection Certificate (NOC), physical examination of dog(s) etc., he/she may authorize his/her representative (Annexure 1.6).

2. In case the pet is found sound and healthy (as per the Annexure 2.3); final NOC (Annexure 2.5) will be issued at the port of entry itself.
3. In case the pet fails to clear physical examination or exhibits clinical signs of diseases mentioned in format at annexure 2.3, it will be taken to the Quarantine Station and will remain under quarantine for 15 days.

During Quarantine Period at AQCS

1. Everyday examination record (Annexure 2.4) will be maintained and testing will be done as per annexure 2.3 if any signs/symptoms will be found, the same will be recorded or updated online. The applicant will bear the charges for testing.
2. Final NOC (Annexure 2.5) will be issued in case negative test reports are obtained for the pet cat under quarantine.
3. In case of the positive testing reports or if the pet dies, deportation/Post –Mortem and incineration will be done at the cost of owner.

***Complete clearance process is depicted at annexure 2 (a, b & c)**

Note: If owner of pet(s) is unable to visit Animal Quarantine & Certification Services personally for the purpose of obtaining No Objection Certificate (NOC), physical examination of cat(s) etc., he/she may authorize his/her representative (Annexure 1.6).

www.abcaus.in

Annexure 2a

Process for Importing Pet Cat(s) into India under Transfer of Residence-Ease of Understanding

Case 1. – Transfer of Residence

Application Filing

Minimum 7 working days before embarkation, applicant will submit the following documents for Advance No Objection Certificate from AQCS;-

Before filling application, please make sure that you are eligible for Transfer of Residence (Proof of two years overseas stay and visa cancellation/relocation proof)

Application form (Annexure 2.1)

Provisional Decision

If documents are proper

Advance No Objection Certificate (Annexure 2.2) along with format for physical examination (Annexure 2.3) is issued and Bill of Entry will be cleared online by AQCS (If coming by cargo)

If there is deficiency in documents

Applicant will be informed back with point wise reasons for rejection (automatic response by system).

Airline will not lift the pets until advance NOC is obtained by the applicant.

Post Arrival Examination

Quarantine Officer will examine the animal(s) (Annexure 2.3) and documents

Decision on Arrival at port of entry

FIT- Final NOC

(Annexure 2.5)

Unfit-Animal exhibiting clinical signs of diseases as mentioned in format at annexure 2.3 will be quarantined at respective AQCS (15 days) and necessary testing will be carried out.

Operations in Quarantine

Testing parameters for confirmatory diagnosis. Everyday examination record (Annexure 2.4) and concerned test reports will be recorded or updated

FIT cases-Final NOC will be issued after Quarantine period in AQCS

Decision

UNFIT-Treatment may be suggested with consent of owner/Death cases-Post mortem and Incineration

www.abcaus.in

Annexure 2b

Process for Importing Pet Cat(s) into India under Re-import - Ease of Understanding

Case 2. Re-import (As per Circular No. 25 / 2013-Customs)

Application Filing

Minimum 7 working days before embarkation, applicant will submit the following documents for Advance No Objection Certificate from AQCS;-

Before filling application, please make sure that you are eligible for Reimport (Copy of earlier export certificate issued by AQCS India)

Application form (Annexure 2.1)

Provisional Decision

If documents are proper

Advance No Objection Certificate (Annexure 2.2) along with format for physical examination (Annexure 2.3) is issued and Bill of Entry will be cleared online by AQCS (If coming by cargo)

If there is deficiency in documents

Applicant will be informed back with point wise reasons for rejection (automatic response by system).

Airline will not lift the pets until advance NOC is obtained by the applicant.

Post Arrival Examination

Quarantine Officer will examine the animal(s) (Annexure 2.3) and documents

Decision on Arrival at port of entry

FIT- Final NOC (Annexure 2.5)

Unfit-Animal exhibiting clinical signs of diseases as mentioned in format at annexure 2.3 will be quarantined at respective AQCS (15 days) and necessary testing will be carried out.

FIT cases-Final NOC will be issued after Quarantine period in AQCS

Operations in Quarantine

Testing parameters for confirmatory diagnosis. Everyday examination record (Annexure 2.4) and concerned test reports will be recorded or updated

Decision

Annexure 3.1.1

Veterinary health certificate for import of horses or other equidae into India,

(As published in Gazette Notification S.O. 752 (E), dated 5th October, 2012 and subsequent amendment vide in Gazette Notification S.O. 185 (E), dated 21st March, 2013)**

1. General requirement: The horse or other equidae shall be accompanied with a valid passport or if the horse or other equid is not originating from countries not issuing passport, it must be accompanied by a complete history sheet with an identification certificate duly authenticated by an official veterinarian of the exporting country.

2. In the case of thoroughbred horses, import shall be allowed for the purpose of breeding, polo and sports only and not for purpose of racing.

3. Testing requirement:

(1) The horse or other equidae shall come from a country, -

(i) where the African Horse Sickness Virus (AHSV) has not been reported for the last two years preceding the exportation;

(ii) free from African Horse Sickness Virus (AHSV) when African Horse Sickness (AHS) is a notifiable disease in the whole country, systematic vaccination is prohibited, importation of equids and their semen, oocytes or embryos are carried out in accordance with Chapter 12.1 of Terrestrial Animal Health Code of World Organization for Animal Health (OIE);

(iii) where the horse or other equidae have not travelled to or through any country infected with African Horse Sickness for the last two years preceding the exportation;

(iv) with a certificate of veterinary authorities certifying the horse or other equidae -

(a) have not shown any clinical signs of African Horse Sickness (AHS) on the day of shipment;

(b) have not been vaccinated against African Horse Sickness (AHS) forty days immediately preceding the exportation;

(c) were protected from culicoides attacks at all time when transiting through an infected zone.

(v) where Contagious Equine Meritis (CEM) has not been reported during the last twenty months preceding the exportation.

Provided that the import of the horse or other equidae from Contagious Equine Metritis (CEM) infected country shall be allowed if the horse or other equid have been kept in an establishment or farm (by whatever name called) which is free from Contagious Equine Metritis (CEM) for three years preceding the exportation and the horse or other equidae have not been mated during last thirty six months preceding the exportation:

Provided further that if the horse or other equidae has been mated within an establishment or farm (by whatever name called), they shall test negative from Contagious Equine Metritis (CEM) on three consecutive occasions each not less than seven days intervals for stallions and pregnant mares, and on three consecutive oestruses for non-pregnant mares.

www.abcaus.in

(vi) After undergoing pre-export quarantine for necessary testing as per Table annexed to the veterinary health certificate, prior to the export.

(2) The horse or other equidae shall be imported only through the International airports at Delhi, Kolkata, Mumbai and Chennai or any other airports notified by the Central Government from time to time.

(3) The importer shall submit all the test reports after completion of the tests indicated at the Table along with a copy of health certificate to the Regional Officer or Quarantine Officer of the Animal Quarantine and Certification Services attached to the airports, seven days (relaxable up to three days I pressing circumstances) prior to the embarkment and shall obtain No Objection Certificate (NOC).

(4) The horse or other equidae shall be allowed to disembark only on the receipt of an original No Objection Certificate (NOC).

4. Special Requirement - No horse or other equidae shall be imported into the country unless certified by a certificate of health in English language signed by an official veterinarian licensed and accredited by the exporting state or country in which a physical examination of the same was made as per the below mentioned Form.

(vi)) the horse or other equidae shows no clinical signs or symptoms of infectious or contagious diseases on the day of shipment.

(2) (i) *the Contagious Equine Metritis (CEM) has not been reported for the last twenty months preceding the exportation.
or
(ii) *the horse or other equidae has been kept in an establishment (name of the establishment) which is free from Contagious Equine Metritis (CEM) for the last three years preceding the exportation and the horse or other equidae have not been mated during last thirty six months preceding the exportation.
or
(iii) *the horse or other equidae has come from an establishment free from Contagious Equine Metritis (CEM) for the last thirty six months preceding the shipment have been mated and tested negative for Contagious Equine Metritis (CEM) and other pathogens on three consecutive occasions each at an interval of not less than seven days for stallions and pregnant mares and three consecutive oestruses foe -non-pregnant mares, on the basis of culture tested on swabs collected from prepuce, urethra, vagina and cervix, as the case may be.
(*Strike off if inapplicable)

(3) the horse or other equidae has been kept in establishment for three months preceding the date of exportation, where no infectious or contagious diseases including Epizootic Lymphangitis, Ulcerative Lymphangitis, Trypansoimiasis, Dourine, Equine Piroplasmosis, Equine Rhiopneumontis, Equine Encephlomyelitis (including Eastern and Western encephalitis), Venezuelan Encephalomyelitis, Equine lnfluenza, Equine Infectious Anaemia, Potomac Horse Fever, West Nile Virus infection and Vesicular Stomatitis has not been reported and no such disease have been occurred on any adjoining premises during the same period of time.

(5) the horse or other equidae has been vaccinated with Equine Influenza virus vaccine and the last such vaccination shall not be less than fourteen days immediately preceding the exportation.

(6) the horse or other equidae has been found to be free from ectoparasites and have been treated with antihelminths.

www.abcaus.in

(7) the horse or other equidae being exported has been kept in isolation in an approved Government quarantine station and subjected to the following tests in Table with negative results: -

Disease (1)	**Diagnostic Test (2)**	**Condition (3)**
Glanders	Mallein/Complement Fixation Test (CFT)	During fifteen days immediately preceding exportation.
Dourine	Complement Fixation Test (CFT)	During fifteen days immediately preceding exportation.
Equine Infectious Anaemia (IIA)	Coggins (Immunodiffusion) Test	During thirty days Immediately preceding exportation.
Infectious Equine Abortion (Salmonella abortus equi)	Serum Agglutination Test (titre not greater than one or three thousand)	During fifteen days immediately preceding exportation.
Equine Viral Arteritis (EVA)	Virus Neutralisation Test	Two occasions at least fourteen days apart with negative result during twenty eight days immediately preceding exportation.
Vesicular Stomatitis	Complement Fixation Test (CFT) or Enzyme-Linked Immunosorbent Assay (ELISA)	At least twenty one days after the commencement of pre-export quarantine
Contagious Equine Metritis (CEM)	Culture of Micro-organisms	Three consecutive occasions not less than seven days for stallions and pregnant mares and three consecutive Oestruses for non-pregnant mares.
Equine Piroplasmosis (Babesia equi and Babesia caballi)	Complement Fixation Test During thirty days (CFT)/Indirect Fluorescent Antibody immediately preceding Test (IFAT) exportation.	During thirty days immediately preceding exportation
Hendra and Nipah virus	Real Time PCR	During twenty one days immediately preceding exportation.
West Nile Virus	Reverse Transcription nested PCR (Rt-nPCR) or IgM Capture ELISA or Virus Neutralization/Plaque Reduction Neutralization Test (PRNT) or Haemaggulatination Inhibition (HI)	To be tested negative Seven to ten days immediately preceding exportation.
Japanese Encephalitis	Haemagglutination Inhibition	To be tested negative seven days immediately preceding exportation
Venezuelan Equine Encephalomye litis	Haemagglutination Inhibition (HI)/ Complement Fixation (CFT)/ Plaque Reduction Neutralization Test (PRNT)	Not less than fourteen days after the commencement of pre-export quarantine.

N.B.: (i) No Testing is necessary in respect of such diseases for which freedom status has been certified.

(ii) Date of testing shall also be specified against each test.

VETERINARY CERTIFICTE FOR THE IMPORT OF LIVE SWINE FOR BREEDING PURPOSES INTO INDIA

Exporting Country: _____

Ministry of: _____

Department: _____

Province or District, etc: _____

I. IDENTIFICATION OF THE ANIMAL(S)

Official ear mark	Breed	Sex	Age

II. Origin of the Animal(s)

Name and address of the exporter: _____

Place of Origin of animal(s): _____

Name and address of the establishment from where the animal(s) has/have been sourced: __

_____

III. Destination of Animal(s)

Country: _____

Name and address of the consignee: _____

Email:_____

Nature and identification of means of transport: _____

Pre Import requirements:

1. Import of live animal(s) is/are allowed through the ports located at Chennai, Mumbai, Kolkata and Delhi.

2. At least seven days before the import into India, the test report conducted as per clause(9) to be submitted to Quarantine Officer for examination along with a draft copy of health certificate and the importer will obtain prior NOC from the Quarantine Officer before the actual shipment.

www.abcaus.in

If the test reports are not satisfactory and has not been conducted as per the said clause, the Quarantine Officer may not be allow landing of the animal at designated ports of India.

IV. Sanitary Information

The undersigned Official Veterinarian certifies that the animal described above and examined on this day and the live swine:

1) Show no clinical signs of disease:

2) Satisfy the following requirements:

a) is born and has been continually resident in exporting country and,

b) the live pig destined to India meets the following requirements:

(1) **Foot and Mouth Disease (FMD):**

a) The animal has been kept in FMD free country or zone since birth where vaccination is not practiced or FMD free compartment

Or

were kept since birth or for at least the past three months in a FMD free country or zone where vaccination is practiced; and were subjected to a test for FMD with negative results;

b) The animal has shown any sign of FMD on the day of shipment.

c) If transiting an infected zone, were not exposed to any source of FMDV during transportation to the place of shipment.

(2) Aujeszky's disease (AD)

The animal:

(i) showed no clinical sign of AD on the day of shipment;

(ii) comes from an establishment located in an AD free country or zone;

(iii) has not been vaccinated against AD.

or

(i) has been kept exclusively in AD free establishments since birth;

(ii) has not been vaccinated against AD;

(iii) was subjected to a serological test to the whole AD virus, with negative results, within 15 days prior to shipment and showed no clinical sign of AD on the day of shipment;

or

a) were kept exclusively in AD free establishments since birth;

www.abcaus.in

b) has not been vaccinated against AD;

c) was isolated in the establishment of origin or a quarantine station, and were subjected to a serological test to the whole AD virus, with negative results, on two occasions, at an interval of not less than 30 days between each test, the second test being performed during the 15 days prior to shipment.

(3) African swine fever (ASF):

The country is free from African Swine Fever (ASF); or

the animal showed no clinical sign of ASF on the day of shipment and were kept in an ASF free country or zone since birth or for at least the past 40 days.

(4) **Transmissible Gastro Enteritis (TGE)**

The live animal showed no clinical sign of TGE on the day of shipment; and either

a) come from an establishment in which no case of TGE was reported during the 12 months prior to shipment; and

b) showed negative results to a diagnostic test for TGE during the 30 days prior to shipment, and were kept isolated during this period; or

c) come from a country in which TGE is officially notifiable and no clinical case has been recorded in the previous three years

(5) Classical Swine Fever (CSF)

a) showed no clinical sign of CSF on the day of shipment;

b) were kept in a country, zone or compartment free from CSF since birth or for at least the past three months;

Or

were kept since birth or for the past three months in a CSF free compartment;

3) have not been vaccinated against CSF, nor are they the progeny of vaccinated sows, unless there are means, validated in accordance with the Terrestrial Manual, of distinguishing between vaccinated and infected pigs. or

(6) Porcine Reproductive and Respiratory Syndrome (PRRS):

(i) If the country (name of the country) is not free from Porcine Reproductive and Respiratory Syndrome (PRRS) virus:

a) the animal has been sourced from the zone (name of the zone free from PRRS virus). or,

www.abcaus.in

b) has been obtained from the establishment (name and address of the establishment) that are free from PRRS for last two years and the establishment is under continuous surveillance programme by the veterinary authority of the exporting country. All biosecurity measures are undertaken in the establishment as per the OIE principles.

(7) **Porcine Brucellosis (Brucella means the Brucella species as defined in Terrestrial Animal Health Code):**

showed no clinical sign of infection with Brucella on the day of shipment; either

a) originate from a herd free from infection with Brucella; OR

b) originate from a herd in which a statistically valid sample of the breeding pigs, selected in accordance with existing Terrestrial Animal Health Code of OIE., was tested within 30 days prior to shipment, demonstrating the absence of infection with Brucella; OR

c) were isolated for 30 days prior to shipment and all pigs in isolation were tested for infection with Brucella within that period with negative results.

The animal has been sourced from the establishment which has not reported Porcine Epidemic Diarrhoea for last 40 days and no animals from PED infected establishments was introduced in such and establishment from where the animals were sourced for export to India.

(8) The animal has been quarantined in government approved pre-export quarantine premises for a period of not less than 30 days or till completion of the last tests mentioned below:-

S. No	**Disease**	**Test**	**Result**
01	African Swine Fever	ELISA	Negative
02	Porcine Brucellosis	BBAT/ ELISA/FPA/CF	Negative
03	Classical swine fever	NPLA/FAVN/ELISA	Negative
04	Porcine respiratory and reproductive syndrome	ELISA or IFA	Negative
05	Porcine Epidemic Diarrhoea Virus and Porcine Delta Corona Virus	PCR	Negative
06	Transmissible Gastro Enteritis(TGE)	ELISA/VN	Negative
07	Swine Vesicular Disease	Virus Isolation/ ELISA/ RT-PCR	Negative
08	Swine Influenza A virus	ELISA/ Virus Isolation/ HI	Negative

www.abcaus.in

09	Tescho Virus Encephalomyelitis	VN/Agent ID/ FAT	Negative for virulent strains.
10	Aujeszky's disease (AD)	ELISA	Negative

10) During the pre-export quarantine period each pig has been subjected to the following treatment:

a) Internal parasites twice using broad spectrum anthelmintic effective for both cestodes and nematodes approved by the country of export.

b) External parasites using the parasiticidal dip or spray at the time of entry in to quarantine station and again immediately prior to departure from the quarantine premises.

c) The pig(s) have been treated twice with any broad spectrum antibiotic 14 days apart and the first being within 48 hours of entering into pre-export quarantine.

11.) Within 48 hours of the pigs entering and leaving the pre-export quarantine premises, the animal(s) were examined and found free from any clinical evidence of infectious and contagious diseases and ecto-parasites and is fit to travel.

(12) The vehicle in which the animal(s) were transported from the approved pre export quarantine premises to the port or airport of departure was cleaned and disinfected with a disinfectant approved by the appropriate veterinary authority.

(13) The animal has not been vaccinated against brucellosis.

(14) Are examined clinically on the day of departure and found properly grown for age and are below three months of pregnancy and are found suitable for transport.

(15) The crate(s) (wooden or of impervious material), in which the pigs are exported is/ are new, unused and have been thoroughly cleaned & disinfected.

3. Sanitary Information

The undersigned Official Veterinarian certifies that the animal/s described at 2 above have been examined on this day and:

1) show no clinical sign of disease;

2) satisfy the following requirements:

(a) are born and have been continually resident in exporting country;

(b) parent and grandparent of the animal under export also originate from exporting country;

(c) have never been fed with feed of a ruminant origin;

(d) are more than two months of age at the time of export; and

(e) female sheep and goat are not more than three months pregnant on the scheduled date of export and found suitable for transport and;

A. Bovine Spongiform Encephalopathy (BSE)

The Country is categorized under negligible BSE Risk by the OIE.

B. Scrapie

(1) The country or zone is free from scrapie in terms of OIE guidelines.

or

(2) the country or zone is not free from Scrapie and the animals are sourced from the country or zones that fulfills the following conditions:

(a) Scrapie is compulsorily notifiable;

(b) an awareness, surveillance and monitoring system as referred to in Article 14.8.2 of Terrestrial Animal Health Code is in place;

(c) affected sheep and goats are killed and completely destroyed;

(3) the sheep and goats selected for export showed no clinical sign of scrapie on the day of shipment.

C. Foot and Mouth Disease(FMD)

(a) The Country or zone or compartment is free from Foot and mouth Disease (SAT 1,2,3 and C) without vaccination and the animals fulfills the requirements as prescribed in Article 8.8.10 of Terrestrial Animal Health Code of OIE,

or

The Country/ zone and compartment is free from Foot and Mouth Disease (SAT 1,2,3 and C) with vaccination and the animals fulfills the requirements as prescribed in Article 8.8.11 of Terrestrial Animal Health Code of OIE, or

www.abcaus.in

(b) the Country is not free from FMD but the FMD strain is prevailing in the Country other than (O,A and Asia 1) and the Official Control Programme in Place recognized by OIE. The animals sourced from the Country/Zone that fulfills the requirements as prescribed in Article 8.8.12 of Terrestrial Animal Health Code of OIE.

D. Pesti des petits ruminant

(a) The Country/zone is free from PPR and the animals were kept in the PPR free country and zones for 21 days before shipment and showed no symptoms for PPR on the day of shipment,

or;

(b) the Country or zone is not free from PPR and the animals fulfil the requirements as per Article 14.7.10 of Terrestrial Animal Health Code of OIE.

E. Contagious Agalactia

The animals showed no clinical sign of contagious agalactia on the day of shipment and were kept since birth or for the six months prior to shipment in an establishment where no case of contagious agalactia was officially reported during that period; and also were kept in a quarantine station for the 21 days prior to shipment.

F. Nairobi Sheep Disease

The Country is free from Nairobi sheep disease

G. Border's Disease

The animals were sourced from the Country or Zone or compartment free from Border's disease and the animals have not shown the shredding of virus when tested with RT-PCR before entering into the pre-export quarantine.

H. Rift Valley Fever

The animals were sourced from the country or zone free from RVF and the animals fulfil the requirements as prescribed in Article 8.15.7 or the animals sourced from the country or zone not free from RVF and the animals fulfils the requirements of Article 8.15.8 or 8.15.9 as the case may be.

I. Caprine Arthritis /Encephalitis

(i) The animals showed no clinical sign of caprine arthritis/encephalitis on the day of shipment;

(ii) animals over one year of age were subjected to a diagnostic test for caprine arthritis/encephalitis with negative results during the 30 days prior to shipment; or

(iii) caprine arthritis/encephalitis was neither clinically nor serologically diagnosed in the sheep and goats present in the flocks of origin during the past three years, and also that no sheep or goat from a flock of inferior health status was introduced into these flocks during that period.

J. Contagious Caprine Pleuro Pneumonia (CCPP)

(i) The animals were kept in a CCPP free country since birth or for at least three months and the animal showed no signs of CCPP or

www.abcaus.in

(ii) were subjected to a complement fixation test for CCPP with negative results, on two occasions, with an interval of not less than 21 days and not more than 30 days between each test,

(iii) were isolated from other domestic goats from the day of the first complement fixation test until shipment;

(iv) were kept since birth, or for at least the past 45 days, in an establishment where no case of CCPP was officially reported during that period, and that the establishment of origin was not situated in a CCPP infected zone;

K. Enzootic Abortion of Ewes (EAE) (Ovine Chlamydiosis)

(1) The animals remained since birth, or for the previous two years, in establishments where no EAE was diagnosed during the past two years;

(2) showed no clinical sign of EAE on the day of shipment;

(3) were subjected to a diagnostic test for EAE with negative results within the 30 days prior to shipment

Or

The flocks from where the animals have been sourced are free from EAE and satisfies the following:

(1) The flock was under official veterinary surveillance;

(2) all sheep and goats showed no clinical evidence of EAE infection during the past two years;

(3) a statistically valid number of sheep and goats over six months of age were subjected to a diagnostic test for EAE with negative results within the past six months;

(4) all sheep or goats are permanently identified;

(5) no sheep or goat has been added to the flock since 30 days prior to the flock test referred to in point 3) above unless:

(a) either the additions were isolated from other members of the flock in the establishment of origin for a minimum period of 30 days and then were subjected to a diagnostic test for EAE with negative results, before entry into the new flock; or

(b) they originated from an establishment of equal health status

L. Maedi-Visna

(1) the animals were sourced from the country free from Maedi Visna.

(2) animals over one year of age were subjected to a diagnostic test for maedi-visna with negative results during the 30 days prior to shipment;

(3) maedi-visna was neither clinically nor serologically diagnosed in the sheep and goats present in the flocks of origin during the past three years, and also that no sheep or goat from a flock of inferior health status was introduced into these flocks during that period.

www.abcaus.in

M. OVINE EPIDIDYMITIS (Brucella ovis)

(1) the animals come from a sheep flock free from ovine epididymitis;

(2) for sheep over six months of age, the animals were isolated in the establishment of origin for the 30 days prior to shipment and were subjected to the diagnostic tests for Brucella ovis (B. ovis) with negative results; or

(3) for sheep from a flock other than that stated in point (1) above, the animals were isolated prior to shipment and were subjected to the diagnostic tests for B. ovis with negative results on two occasions, with an interval of 30 to 60 days between each test, the second test being performed during the 15 days prior to shipment.

N. Sheep Pox and Goat Pox

(1) were kept since birth, or for the past 21 days, in an establishment where no case of sheep pox and goat pox was officially reported during that period, and that the establishment was not situated in a sheep pox and goat pox infected zone; or

(2) were kept in a quarantine station for the 21 days prior to shipment;

(3) have not been vaccinated against sheep pox and goat pox; or

(4) were vaccinated using a vaccine complying with the standards described in the Terrestrial Manual not less than 15 days and not more than 4 months prior to shipment (the nature of the vaccine used, whether inactivated or modified live virus, and the virus types and strains included in the vaccine shall also be stated in the certificate).

O. Blue Tongue

(1) the animals were kept in a country or zone either free or seasonally from bluetongue since birth or for at least 60 days prior to shipment; or

(2) the animals were kept in a country or zone either free or seasonally free from bluetongue for at least 28 days, then were subjected, with negative results, to a serological test to detect antibodies to the BTV group and remained in the free country or zone until shipment; or

(3) the animals were kept in a country or zone either free or seasonally free from bluetongue for at least 14 days, then were subjected, with negative results, to an agent identification test, and remained in the free country or zone until shipment; or

(4) the animals:

(a) were vaccinated, at least 60 days before the introduction into the free country or zone, from which they are to be exported, against all serotypes demonstrated to be present in the source population through a surveillance programme as described in Articles 8.3.14. to 8.3.17.;

(b) were identified as having been vaccinated;

(c) remained in the free country or zone for at least seven days until shipment;

AND

(5) if the animals were exported from a free zone within an infected country, either:

www.abcaus.in

a) did not transit through an infected zone during transportation to the place of shipment; or

b) were protected from attacks from Culicoides in accordance with point 2 of Article 8.3.13. at all times when transiting through an infected zone; or

c) had been vaccinated in accordance with point 4) above.

P. Anthrax

(1) The animals were kept for the 20 days prior to shipment in an establishment where no case of anthrax was officially declared during that period; or

(2) were vaccinated, not less than 20 days and not more than 12 months prior to shipment in accordance with the Terrestrial Manual.

Q. Tuberculosis (*Mycobacterium tuberculosis***)**

(1) infection with M. tuberculosis complex in animals is a notifiable disease in the entire country;

(2) the goats showed no clinical signs of infection with M. tuberculosis complex on the day of shipment;

either:

a) the goats have been kept since birth in herds in which no case of infection with M. tuberculosis complex has been detected for the past three years; or

b) have been isolated for at least six months prior to shipment including protection from contact with any reservoir of M. tuberculosis complex and all isolated animals showed negative results to at least two consecutive tests carried out at a six month interval, with the second test performed within 30 days prior to shipment.

c) The animals have been kept in an Government Approved quarantine for at least 30 days or till the diagnostic tests are completed before shipment to India and during the quarantine period the animals are under the supervision of Government Veterinarian of the exporting country.

(d) The animals have been subjected for examination for the following diseases with negative result in each case within the last 45 days prior to entering the pre export quarantine and/or within the last 30 days prior to exportation while in the pre export quarantine:

Sl. No.	Name and Disease	Name of the Test
01	Maedi Visna	ELISA (in case found positive confirm with RT-PCR)
02	Sheep Pox/ Goat Pox	PCR
03	Brucella Ovis	CFT/BBAT
04	Borders Disease	RT-PCR
05	Enzotic Abortion of Ewe	RT-PCR

www.abcaus.in

06	Caprine Arthritis	ELISA/PCR
07	Contagious Aqalactia	RT-PCR
08	Blue Tongue	Agent Identification.

*Tests not to be performed if the country freedom has been certified.

** All the test report should be made available to the importer and quarantine officer.

(h) During the pre-export quarantine the following the treatment has been provided:

1) Internal Parasites using approved broad spectrum anthelmintic according to the manufactuers' instructions (if not already given);

2) Liver Fluke using the Flukicides according to the manufacturers' instructions; and

3) External Parasites (including Ticks) using the approved parasiticidal dip or spray according to the manufacturers' instructions.

4) while in the approved quarantine premises the animals were given two injections of broad spectrum antibiotic.

5) Within 48 hours of the sheep entering and leaving the pre-export quarantine premises the animals were examined and found free from clinical evidence of any infectious and contagious diseases as mentioned above and ecto parasites.

6) Has/Have not been vaccinated against Brucellosis.

7) Were protected from insect vectors during quarantine and transportation to the place of shipment.

(i) The animal(s) were transported in pens/containers from the approved quarantine premises to the place of embarkation as well as pens in the aircraft have been cleaned and disinfected before loading to government approved standards.

POST IMPORT REQUIREMENTS:

1. The import will be subjected to fulfillment of the procedure as mentioned in S.O. 1496 (E) dated 10 th June, 2014.

2. The animals shall be kept under quarantine in Government Quarantine premises for a period of 28 days and subjected to clinical examination. The quarantine officer shall carry out those tests where there is requirements or specific certification has not been provided or for evidence of any contagious and infectious diseases and ectoparasites.

3. In case of positive findings, appropriate action shall be taken as in consultation with the Department of Animal Husbandry and Dairying, Ministry of Fisheries, Animal Husbandry and Dairying, Government of India.

4. The hay, straw and feed accompanying the animals must be destroyed by incineration on arrival in India.

Annexure 5.1.2

VETERINARY HEALTH CERTIFICATE FOR THE IMPORT OF LIVE GOAT INTO INDIA

Exporting country:_____

Ministry of: _____

Department: _____

Province or District, etc.: _____

I. Identification of the animal/s

Species				
Sl. No.	Breed	Age	Sex	Official ear mark

II. Origin of the animal/s

Name and address of the exporter:_____

Place of origin of the animal/s: _____

III. Destination of the animal/s

Country of destination: _____

Name and address of consignee: _____

Nature and identification of means of transport: _____

IV. Sanitary information

The undersigned Official Veterinarian certifies that the livestock described above and examined on this day:

1) shows /show no clinical sign of disease;

2) satisfies/ satisfy the following requirements:

www.abcaus.in

(a) Are born and have been continually resident in exporting country.

(b) Parent and grandparent of the animal under import also originates from exporting country.

(c) Have never been fed with feed of ruminant origin.

(d) Are more than one year of age at the time of export.

(e) Female goats are not more than 3 months pregnant at the scheduled date of export and found suitable for transport.

(f) Bovine Spongiform Encephalopathy (BSE) and Scrapie are compulsorily notifiable diseases in exporting country and the country is free from TSE group of diseases.

(g) The exporting country is free from Foot and Mouth disease (Type C, SAT 1,2,3), Vesicular stomatitis, Rinderpest, Peste des petits ruminants, Contagious agalactia and Rift valley fever.

(h) Originate from flocks and establishment that are free from clinical or other confirmation of Caprine Brucellosis, Bluetongue, Q fever, Enzootic abortion, Leptospirosis, Salmonellosis (S. abortus ovis), Contagious Caparine Pleuropneumonia, Aujeszky's disease, Sheep & Goat Pox, Pulmonary Adenomatosis, Foot & Mouth Disease (Type O, A, Asia I), Paratuberculosis (Johne's disease) and these diseases have not been reported during the last two years and no animal from a herd of inferior health status was introduced in the flock / establishment during that period.

Caprine arthritis/encephalitis was neither clinically nor serologically diagnosed in the goats present in the flocks of origin during the past five years, and that no goats from a flock of inferior health status was introduced into these flock during this period.

(i) Has/Have been subjected to examination for the following diseases with negative result in each case within the last 45 days prior to entering the pre-export quarantine and/or within the last 30 days prior to exportation while in the pre-export quarantine:

Sr. No.	Disease	Test	Within 45 days (Date)	Within 30 days (Date)
1.	Bluetongue	AGID/ELISA/Agent id., PCR)		(Retest)
2.	Paratuberculosis	DTH/ELISA		(Retest)
3.	Leptospirosis	MAT		
4.	Q fever	CFT		
5.	Aujeszky's disease	ELISA/VN		
6.	Caprine Brucellosis	CFT/BBAT		
7.	Caprine	AGID/ELISA		

www.abcaus.in

	arthritis/encephalitis			
8.	Enzootic abortion	CF		
9.	Contagious Caparine Pleuropneumonia	CF		
10.	Salmonellosis (S. Abortus ovis)	Agent id.		

(j) During 45 days prior to entry in the approved pre-export quarantine premises and again while in the quarantine premises but with not less than 14 days interval in between, the animal(s) were treated for:

(a) Internal Parasites twice using broad spectrum anthelmintic

(b) Liver Fluke using Flukicide

(c) External parasites using the parasiticidal dip or spray.

(k) While in pre-export quarantine, the animal(s) were treated for leptospirosis twice with dihydrostreptomycin (25mg per Kg of live body weight) at an interval of 14 days. The second injection being given within 24 hours of the intended date of export.

(l) Within 48 hours of the goats entering and leaving the pre-export quarantine premises, the animal(s) were examined and found free from any clinical evidence of infectious and contagious diseases and ectoparasites.

(m) The vehicle in which the animal(s) were transported from the approved pre-export quarantine premises to the port or airport of departure were cleaned and disinfected with a disinfectant approved by the appropriate veterinary authority.

(n) The animals were transported directly to the place of embarkation from the pre-export quarantine premises and have not come into contact with any other animals of a lesser health status.

(o) Were protected from insect vectors during quarantine and transportation to the place of shipment.

(p) The animal(s) were transported in pens/containers from the approved quarantine premises to the place of embarkation as well as pens in the aircraft have been cleaned and disinfected before loading to government approved standards.

(q) Has/Have not been vaccinated against Brucellosis.

Advance No Objection Certificate for import of Sheep/Goat(s)

Acknowledgement No: ……. Dt. ……..
Certification No: …… Dt. ……

To

……..
……

Sub: Import of … Sheep/Goat(s) from ……. (Date of shipment …….) under DGFT license No. …….. dated ……..

(Transfer to AQCS for Quarantine).

Sir,

In reference to your application bearing acknowledgement no……. dated ……, the import of …. Sheep/Goat(s) from ……. on …….by …. Airlines is allowed as per DGFT license No. …… dated …….The import clearance of the Sheep/Goat(s) at the airport will be subject to the fulfillment of import health guidelines in the original veterinary health certificate as per license requirement and identification of the Sheep/Goat(s). In case of non-fulfillment of health guidelines in the original certificate or the health certificate lacks authenticity and not certified by the competent authority or the identity of the Sheep/Goat (s) is/are not as per the health certificate on arrival in India, the importer shall deport the Sheep/Goat (s) at their own cost as per Notification No. S.O. 1495 and 1496 (E) dated 10.06.2014.

This permission may be cancelled on the basis of any indication of new disease threat on or before the date of arrival. **The Sheep/Goat(s) will be transferred to AQCS, _____ for keeping under Quarantine immediately after arrival.**

This is not the Import Quarantine Clearance Certificate. (Provisional clearance will be accorded on arrival).

The detail of the Sheep/Goat(s) is as under:-

Standard Operating Procedure for Import of Bovine(s):

Pre Arrival Requirements:

1. Minimum 07 days before embarkation, the application form (Annexure 6.1) will be submitted online by the applicant.
2. After examining the uploaded forms, Advance No Objection certificate (NOC (Annexure 6.2)) will be issued by the concerned Animal Quarantine and Certification Services.

On Arrival at the Port of Entry

1. The Bovine(s) will be taken to the Quarantine Station and will remain under quarantine for 30 days.

During Quarantine Period at AQCS:

1. Everyday examination record (Annexure 6.3) will be maintained and testing reports (against Bovine Viral Diarrhoea, Malignant catarrhal fever, Rift Valley Fever, Crimean-Congo Haemarrhagic Fever, Schmallenberg virus infection, Enzootic bovine leucosis) will be updated online. Samples will be drawn during 2nd week. The applicant will bear the charges for testing.
2. Final NOC (Annexure 6.4) will be issued in case negative test reports are obtained for the Bovines(s) under quarantine.
3. In case of the positive testing reports, deportation will be done at the cost of owner. If Bovine(s) dies, Post –Mortem and destruction will be done at the cost of owner.

***As per notification S.O. 1495(E), 10.06.2014, Live animals are allowed to be imported in Chennai, Kolkata, Mumbai and Delhi except for pet animals.**
***Complete clearance process is depicted at Annexure 6.**

www.abcaus.in

Annexure 6

Process for Importing Bovine(s) into India-Ease of Understanding

Application Filing

Minimum 7 working days before embarkation, importer will submit following documents to obtain prior permission from AQCS as per Gazette notification no. 1495 (E);-

Before filling application, please make sure that you have a valid DGFT (http://dgftcom.nic.in/eComapplications.html)

Application form (Annexure 6.1)

Provisional Decision

If documents are proper.

Advance No Objection Certificate (Annexure 6.2) will be issued and Bill of Entry will be cleared online by AQCS

If there is deficiency in documents.

Applicant will be informed back with point wise reasons for rejection.

Airline will not lift the bovine(s) until advance NOC is obtained by the applicant (as per Gazette notification no. 1495 (E)

Post arrival Operations in Quarantine

Bovine(s) will be transferred to the concerned AQCS for quarantine (30 days). Daily records (Annexure 6.3), periodic clinical examination and laboratory diagnosis will be carried out.

Everyday examination record, status of sample withdrawal and concerned test reports will be updated online till final quarantine clearance

Testing parameters during Quarantine Period

- Serum - Bovine Viral Diarrhoea (Virus antigen test), Malignant catarrhal fever(IFA/PCR), Rift Valley Fever(VN), Crimean-Congo Haemarrhagic Fever, Schmallenberg virus infection(PCR), Enzootic bovine leucosis (AGID/ELISA/PCR)- NIHSAD Bhopal

*&** - apart from BVD, IBR, Brucellosis and Endoparasites are also being tested
*if country is not free for certain diseases, the testing Parameters would be mandate to test.

Decision

Final NOC (Annexure 6.4) will be issued if the bovine(s) is/are found fit and healthy during entire quarantine period.

If the bovine(s) develops sign/symptoms of an infectious disease confirmed by laboratory reports, then the RO/QO will issue a notice to the importer to deport or re-export as per the Gazette Notification S.O. No. 1495 (E)

(II) Description of Animals.

Animal identification number and Breed	**Detail of**		**Date of birth or age**	**Sex**	**Month of pregnancy (if applicable)**
	Sire	**Dam**			

(III) General details about the animal:

The bovine animal mentioned at paragraph (II) above -

(i) is permanently identified by a unique animal identification number;

(ii) was born and have been continually residing in the exporting country; or was born in a country having equal or better animal health status than the exporting country;

(iii) is less than five months pregnant;

(iv) has normal karyotype; or

(v) is free of the all known breed specific genetic disorders including-

Bovine Leukocyte Adhesion Deficiency (BLAD) Syndrome, Citrullinaemia, Deficiency of Uridine Monophosphate Synthase (DUMPS), Complex Vertebral Malformation (CVM), Brachyspina and Factor XI deficiency syndrome.

The exporting country may also provide the Genetic Marker Report of the animal if available.

www.abcaus.in

(IV) Sanitary Information:

The official veterinarian certifies that the bovine animal described at paragraph (II) above-

1. was examined on that day and showed no sign of any disease.
2. satisfies the following requirements (delete the requirement which are not applicable).

2.1 Bovine spongiform encephalopathy (BSE)

originates from a country posing a negligible or controlled Bovine spongiform encephalopathy (BSE) risk as per the official recognition of the country by World Organization for Animal Health (OIE) and was born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants was effectively enforced.

2.2 Foot and mouth disease (FMD)

the exporting country is free from Foot and mouth disease (SAT-1,2,3 and Type-C) without vaccination, the animal was kept in the exporting country since birth or for at least the past three months and has not been vaccinated;

Or

if animal originates from FMD free country with vaccination, the animal was kept in a quarantine station for the thirty days prior to shipment and was subjected to a diagnostic test for Foot and mouth disease virus (FMDV) with negative results at least twenty-one days after the commencement of quarantine.

2.3 Vesicular stomatitis (VS)

was kept since birth or for at least the past twenty-one days in a VS free country;

Or

animal was kept, since birth or for the past twenty-one days in an establishment where no case of VS was reported during last two years; and was kept in quarantine station for the thirty days prior to shipment and was subjected to diagnostic test for VS with negative results at least twenty-one days after the commencement of quarantine; and was protected from insect vectors during quarantine and transportation to the place of shipment.

2.4 Rift valley fever (RVF)

animal originates from a RVF free country.

2.5 Lumpy skin disease (LSD)

animal originates from a LSD free country.

2.6 Contagious bovine pleuropneumonia (CBPP)

animal originates from a CBPP free country.

2.7. Bluetongue (BT)

animal was kept in a BT free country since birth;

www.abcaus.in

Or

the country of export (name of country) is not free from BT and animal was protected from Culicoides attacks in a vector protected Blue tongue virus (BTV) free establishment for at least twenty eight days and then subjected to a Competitive Enzyme Linked Immunosorbent Assay (ELISA) test to detect antibody to the BTV group with negative results and remained in the Culicoides protected BTV free establishment until shipment.

2.8. Bovine tuberculosis

animal originates from a herd free from Bovine tuberculosis located in a country or zone free from bovine tuberculosis;

Or

originates from a herd free from Bovine tuberculosis and was subjected to the tuberculin test for Bovine tuberculosis with negative results during thirty days prior to shipment;

or

has been isolated for at least ninety days in the quarantine and was subjected to two tuberculin tests (with a gap of minimum sixty days between the two tests) with negative results.

2.9. Paratuberculosis

animal originates from Paratuberculosis free country;

or

originates from a herd that had no case of clinical Paratuberculosis in the last two years; and

was subjected to Delayed Type Hypersensitivity (DTH) or Enzyme Linked Immunosorbent Assay (ELISA) or Faecal Culture Test with negative result during thirty days prior to shipment.

2.10. Bovine brucellosis

animal originates from Brucellosis free country;

or

originates from a herd in which no clinical sign of Bovine brucellosis was reported during the six months prior to shipment; and

originates from a zone free from Bovine brucellosis, or from a herd officially free from bovine brucellosis and was subjected to a serological test for bovine brucellosis with negative results during the thirty days prior to shipment;

or

originates from a herd free from bovine brucellosis and was subjected to Buffered Brucella Antigen or Complement Fixation, and ELISA tests with negative results during the thirty days prior to shipment;

if the bovine animal originates from a herd other than those mentioned above:

www.abcaus.in

was isolated prior to shipment and was subjected to a serological test for bovine brucellosis (Buffered Brucella Antigen or Complement Fixation test, and Enzyme Linked Immunosorbent Assay (ELISA), with negative results on two occasions, with an interval of not less than thirty days between each test, the second test being performed during the fifteen days prior to shipment. These tests are not considered valid in female animal which has calved during the past fourteen days.

2.11. Infectious bovine rhinotracheitis/Infectious pustularvulvo-vaginitis (IBR/IPV)

animal originates from IBR/IPV free country;

or

animal originates from an IBR/IPV free herd;

or

was kept in a quarantine station for the thirty days prior to shipment and was subjected to a diagnostic test for Infectious bovine rhinotracheitis / Infectious Pustularvulvo-vaginitis (IBR/IPV) on a blood sample on two occasions with negative results, at an interval of not less than twenty one days.

2.12. Bovine genital campylobacteriosis

animal originates from Bovine genital campylobacteriosis free country,

or

was kept in an establishment in which no case of Bovine genital campylobacteriosis has been declared-

(i) For female bovine

animal is either virgin heifer, or the culture of vaginal mucus for the presence of the causal agent proved negative.

(ii) For male bovine

has never been used for natural service, and microscopic examination of the culture of preputial washing and semen (for sexually mature animal) for the presence of the causal agent proved negative.

2.13. Trichomonosis

animal originates from Trichomonosis free country;

or

was kept in a herd in which no case of Trichomonosis has been reported.

(i) For female bovine

animal is either virgin heifers, or the direct microscopic examination and culture of vaginal mucus for the presence of causal agent proved negative.

(ii) For male bovine

www.abcaus.in

has never been used for natural service, and microscopic examination of the culture of preputial washing and semen (for sexually mature animals) for the presence of the causal agent proved negative.

2.14. Enzootic bovine leucosis (EBL)

originates from a country, zone or compartment free from EBL;

or

originates from a herd in which there has been no evidence of either clinical, post-mortem, or as a result of a diagnostic test for EBL within the previous two years;

or

all bovine animals over twenty four months of age were tested on two occasions while segregated from the herd in an isolation unit approved by the veterinary authority at an interval of four months with last test conducted within thirty days prior to shipment.

or

If less than two years of age the bovine animals come from 'Uterine' dams which have been subjected to a diagnostic test for EBL on a blood sample on two occasions within the preceding twelve months with last test conducted within thirty days prior to shipment; and the animal itself has been tested twice at an interval of at least thirty days between the tests with the last test conducted within thirty days prior to shipment.

2.15. Bovine viral diarrhoea (BVD)

before quarantine, animal was proved negative by virus isolation test or a test for virus antigen and,

after twenty one days in quarantine animal was subjected to virus isolation test or a test for virus antigen with negative result and no sero-conversion.

2.16. Malignant catarrhal fever (MCF)

originates from a country free from MCF;

or

originates from a herd that had no case of MCF in the last two years and was subjected to a diagnostic test with negative result during thirty days prior to shipment.

2.17. Schmallenberg virus (SBV)

Schmallenberg virus infection has never been recorded in the country;

or

before quarantine, all animals were proved negative by agent identification Polymerase Chain Reaction (PCR) and antibody detection Enzyme Linked Immunisorbent Assay (ELISA) and after twenty one days in quarantine, animal(s) was again subjected to agent identification PCR and antibody detection ELISA with negative results.

www.abcaus.in

2.18. Leptospirosis

the bovine animal was tested negative for all prevalent serovars of Leptospires prevalent in cattle in the exporting country by Microscopic Agglutination Test (MAT);

Or

animal was given a complete course of treatment for leptospirosis.

(V) . Pre-export quarantine – disease testing and control:

(1) Animal has been subjected to a pre-export quarantine for a minimum of thirty days duration in a quarantine station approved by the government of the exporting country.

(2) Animal has been given a complete course of treatment if required for: (i) Anaplasmosis, (ii) Babesiosis, (iii) Liver Fluke infestations, (iv) Internal and External parasitic infestations.

(3) During the pre-export quarantine, animal was subjected to the following tests with negative results in a laboratory approved or accredited by the exporting country (whichever applicable) *. Testing is not required for diseases for which country freedom has been certified.

Disease	**Test**	**Date of test 1 (Before entry into pre-export quarantine)**	**Date of test 2 (During pre export quarantine)**
Foot and Mouth Disease (FMD)	SNT / NSP ELISA		
Vesicular stomatitis	CF / ELISA / VN		
Bluetongue	Agent Identification/ Competitive ELISA/PCR		
Bovine tuberculosis	Tuberculin DTH		
Paratuberculosis	DTH / ELISA/Faecal Culture		
Bovine brucellosis	BBAT / CFT / ELISA/FPA		
IBR/IPV	VN / ELISA		
Bovine genital campylobacteriosis	Agent Id.		
Trichomonosis	Agent Id.		
Enzootic bovine leucosis	AGID / ELISA/PCR		
Bovine viral diarrhea (BVD)	Agent Id.		

www.abcaus.in

BVD serology	VN / ELISA		
Malignant catarrhal fever	IFA / PCR		
Rift valley fever	Virus Neutralization (VN)		
Lumpy skin disease	Virus Neutralization (VN)		
Contagious bovine pleuropneumonia	Complement Fixation or ELISA		
Schmallenbergvirus	PCR		
Schmallenberg Serology	ELISA or VN		
Schmallenberg Serology	MAT		

* Delete the test which was not performed. A copy of the test result is to be attached.

(4) Before transportation of animal from the approved pre-export quarantine to the port of departure, the vehicle used for transportation of animal was cleaned and disinfected with a disinfectant approved by the appropriate veterinary authority.

Standard Operating Procedure for Import of Captive Bird(s).

Pre Arrival Requirements:

1. Minimum 07 days before embarkation, the application form (Annexure 7.1) will be submitted online by the applicant.
2. After examining the uploaded forms, Advance No Objection certificate (NOC (Annexure 7.2)) will be issued by the concerned Animal Quarantine and Certification Services.

On Arrival at the Port of Entry

1. The Captive Bird(s) will be taken to the Quarantine Station and will remain under quarantine for 30 days.

During Quarantine Period at AQCS

1. Everyday examination record (Annexure 7.3) will be maintained and testing reports (against Highly Pathogenic Avian Influenza) will be updated online. Samples will be drawn on 21st day. The applicant will bear the charges for testing.
2. Final NOC (Annexure 7.4) will be issued in case negative test reports are obtained for the Captive Bird(s) under quarantine.
3. In case of the positive testing reports, deportation will be done at the cost of owner. If Captive Bird(s) dies, destruction will be done at the cost of owner.

***As per notification S.O. 1495(E), 10.06.2014, Live animals are allowed to be imported in Chennai, Kolkata, Mumbai and Delhi except for pet animals.**
***Complete clearance process is depicted at annexure 7.**

Annexure 7

Process for Importing Captive birds into India-Ease of Understanding

Application Filing

Minimum 7 working days before embarkation, applicant will submit the following documents for Advance NOC from AQCS;-

Before filling application, please make sure that you have a valid DGFT (http://dgftcom.nic.in/eComapplications.html)

Application form (Annexure 7.1)

Provisional Decision

If documents are proper

Advance No Objection Certificate (Annexure 7.2) is issued and Bill of Entry will be cleared online by AQCS

If there is deficiency in documents.

Applicant will be informed back with point wise reasons for rejection (automatic response by system).

Airline will not lift the Captive Birds until advance NOC is obtained by the applicant.

Post arrival Operations in Quarantine

Quarantine Officer will examine the documents and Birds will be transferred to AQCS for quarantine (30 days). Daily record sheet including and laboratory diagnosis will be carried out.

Testing parameters during Quarantine Period

Laboratory for testing Avian Influenza (NIHSAD Bhopal)

Samples: Swab/Serum

Tests: HPAI on the day of arrival and 21st day.

Everyday examination record (Annexure 7.3), status of sample withdrawal and concerned test reports will be updated online till final quarantine clearance

Decision

Final NOC (Annexure 7.4) will be issued if the captive birds is/are found fit and healthy during entire quarantine period.

If the captive birds develop sign/symptoms of an infectious disease confirmed by laboratory reports, then the RO/QO will issue a notice to the importer to deport or re-export as per the Gazette Notification S.O. No. 1495(E)

VETERINARY HEALTH CERTIFICATE FOR THE IMPORT OF CAPTIVE BIRDS (other than poultry) INTO INDIA

Exporting country:_____
Ministry of: _____
Department: _____
Province or District, etc.: _____

I. Identification of the bird(s)

Number	Mark	Species	Age	Sex

II. Origin of the bird(s)

Name and address of the exporter: _____
Place of origin of the bird(s): _____

III. Destination of the bird(s)

Country of destination: _____
Name and address of consignee: _____
Nature and identification of means of transport: _____
Type of containers: _____

IV. Sanitary information

The undersigned Official Veterinarian certifies that the birds described above and examined on this day:

(a) shows /show no clinical signs of disease - New Castle disease (Ranikhet disease), Mycoplasmosis (M. gallisepticum), Fowl typhoid (Salmonella gallinarum), Fowl pox, Avian infectious laryngotrachitis, Avian tuberculosis, Psittacosis-Ornithosis (Avian Chlamydiosis), Fowl cholera (Pasturellosis), Avian enecephalomyelitis, Avian circovirus infection, Avian J virus, African Nile virus and Inclusion body hepatitis.

(b) satisfies/ satisfy the following requirements:

1. The country is free from Avian Influenza (Both Highly Pathogenic Avian Influenza and Low Pathogenic Avian Influenza).

2. The birds come from an establishment or a hatchery where Newcastle disease (Ranikhet disease), Mycoplasmosis (M. gallisepticum), Fowl typhoid (Salmonella gallinarum), Fowl pox, Avian infectious laryngotrachitis, Avian tuberculosis, Psittacosis-Ornithosis (Avian Chlamydiosis), Fowl cholera (Pasturellosis), Avian enecephalomyelitis, Avian circovirus infection, Avian J virus, African Nile virus and Inclusion body hepatitis have not been reported since past 12 months.

www.abcaus.in

3. The birds come from an establishment or a hatchery, which is regularly inspected by official veterinary authority of Federal/Union Government.

4. The birds were subjected to serological diagnostic tests for;

   a. Mycoplasmosis on two occasions at the beginning and at the end of the quarantine period period prior to shipment and found negative,

   b. S. pullorum/ S. gallinarum disease with negative results.

5. The exporting country should have conducted a sero-survelliance within 45 days ahead of export and the status in respect of Avian Influenza (H5 & H7 - subtypes) should be negative.

6. The birds to be imported should not have been vaccinated against Highly Pathogenic Avian Influenza (H5 & H7 - subtypes). If any other vaccine, except the above is used, the same has to be indicated along with the type and name of vaccine and strain, name & address of the manufacturer, date of manufacture and history/schedule of vaccination.

7. The birds were kept in a quarantine station for not less than 30 days prior to shipment.

8. The birds were kept under veterinary supervision for 45 days prior to the shipment and were treated against Psittacosis-Ornithosis (Avian Chlamydiosis) using chlortetracycline.

9. The birds are shipped in new, fresh, clean and disinfected packages.

I, the undersigned, Official Veterinarian certify that the Rabbit(s) described above and examined on this day:

a) shows /show no clinical signs of any disease like Rabbit Haemorrhagic Disease Myxomatosis, Aujesky's Disease, Tularemia, Pasturellosis, Leptospirosis, Chlamydiosis, Brucellosis, Tuberculosis, Rabbit Syphillis, Necrobacillosis, Toxoplasmosis and Rabbits Pox.

b) Satisfies/satisfy the following requirements:

1. The country is free from Rabbit Haemorrhagic Disease (RHD) and Tularemia.
2. In case, the country of origin is considered infected with RHD - the animals:

(i) were kept in a RHD free holding(s)* where no clinical case of RHD was found when inspected by an Official Veterinarian prior to shipment;

OR
were kept in an holding(s) where no clinical case of RHD was reported during the 60 days prior to shipment and no clinical case of RHD was found when inspected by an Official Veterinarian immediately prior to shipment; and

have not been vaccinated against RHD.

3. In case the rabbit(s) are imported from Tularemia infected country:

was not kept in a Tularemia infected zone.
has been treated against parasites (ticks); and
was kept in a quarantine station for 15 days prior to shipment

4. The rabbit(s) was/ were kept since birth or for the six months prior to shipment in a holding(s) where no case of Myxomatosis was officially reported during that period.

www.abcaus.in

5. The rabbits was/ were subjected to serological tests as indicated in brackets against the disease with negative results for Rabbit Haemorrhagic Disease (HI/ELISA), Tularemia (ELISA/Tube Agglutination), Pasturellosis (Agent identification), Leptospirosis (MAT), Chlamydiosis (CF), Brucellosis (CF).

6. The rabbit(s) was/ were subjected for serological test (Compliment Fixation/ELISA) to Myxomatosis 15 days prior to shipment and found negative.

*holding(s) means the owners house.
